PROFESSIONAL SUMMARY

DevOps Engineer (Fresher) with hands-on experience automating CI/CD pipelines using Jenkins, Docker, Docker Compose, and GitHub Webhooks on AWS EC2. Proficient in Linux system administration (RHCSA certified, RHEL 9/Ubuntu), web server management (Nginx, Apache), Shell Scripting, and Git/GitHub. Experienced in designing highly available AWS infrastructures with Auto Scaling Groups, Application Load Balancers, and Launch Templates. Familiar with Kubernetes, Terraform, and Ansible for IaC and configuration management.

TECHNICAL SKILLS

Cloud & AWS:	AWS EC2, Auto Scaling Groups, Application Load Balancer (ALB), Launch Templates, Target Groups, CloudWatch
CI/CD & Automation:	Jenkins, GitHub Webhooks, CI/CD Pipelines, Shell Scripting, Bash, GitHub Actions (Basic)
Containers & IaC:	Docker, Docker Compose, Docker Agent, Kubernetes (Basic), Terraform (Basic), Ansible (Basic)
Web Servers & OS:	Nginx, Apache HTTP Server, LAMP Stack, Linux RHEL 9, Ubuntu, SSH
Databases & VCS:	MySQL, PostgreSQL, MongoDB, Git, GitHub
Languages:	Python, Java, SQL, Bash, HTML, CSS, C, C++

PROJECTS

Automated Multi-Server CI/CD Pipeline – Jenkins, Docker Compose & GitHub Webhooks on AWS EC2

Jun 2026

Stack: AWS EC2, Ubuntu Linux, Jenkins, Docker, Docker Compose, Docker Agent, GitHub Webhooks, WordPress, MySQL, Git, Shell Scripting

- Architected a multi-server CI/CD pipeline on AWS EC2: GitHub Webhooks auto-trigger Jenkins builds on every Git push; Jenkins Shell Scripts run Docker Compose on a dedicated Docker Agent EC2 instance deploying containerized WordPress & MySQL — reducing deployment cycle from 20+ min to under 2 minutes with zero manual effort.

Automated Static Website Deployment – Jenkins, GitHub Webhooks & Nginx on AWS EC2

2026

Stack: AWS EC2, Ubuntu Linux, Jenkins, GitHub Webhooks, Nginx, SSH, Git, Bash Shell Scripting

- Built a CI/CD pipeline on AWS EC2 where GitHub Webhooks trigger Jenkins to auto-deploy a static website to a production Nginx web server via SSH file transfer using Bash Shell Scripting — cutting deployment time from ~15 minutes to under 60 seconds with zero manual steps.

Highly Available Static Website – Auto Scaling Groups & Application Load Balancer on AWS

2026

Stack: AWS EC2, Auto Scaling Groups, Launch Templates, Application Load Balancer, Target Groups, CloudWatch, Apache

- Designed fault-tolerant AWS infrastructure with ALB, Auto Scaling Groups, and Launch Templates running Apache HTTP Server; validated zero-downtime horizontal scaling via CloudWatch stress tests; ALB health checks ensured automatic replacement of unhealthy instances.

WORK EXPERIENCE

Game Programming Intern – TechForce Academy Australia

Jun 2025 – Aug 2025

Remote | Credential ID: RlpCld

- Engineered 3 Unity 3D game modules in C# using OOP design patterns, improving code reusability by 40% and reducing bug count by 30% through structured debugging in an agile remote team.

CERTIFICATIONS

RHCSA – Red Hat | **AWS Cloud Practitioner – GFG** | **MongoDB Basics – MongoDB University** | **Salesforce SysAdmin – GFG** | **Deloitte Data Analytics Virtual Internship**

EDUCATION

B.Tech – Artificial Intelligence & Data Science

Aug 2023 – May 2027

Arya College of Engineering & IT, Rajasthan Technical University | **CGPA: 9.11 / 10**

12th – CBSE

Mar 2022 – May 2023

Govt. Boys Sr. Sec. School No. 2 | **86%**

10th – RBSE

Mar 2020 – Aug 2021

I.G.M Sr. Sec. School | **82.22%**

COMPETITIONS & ACHIEVEMENTS

Participant – UPI Fraud Detection System | Hack Arya Verse 2.0

Apr 2025

- Built a UPI Fraud Detection System on 10,000+ transactions using Logistic Regression, Decision Tree & Random Forest; achieved 95% accuracy, reduced false positives by 20% via feature engineering and hyperparameter tuning.

Participant – Textile Management System | Hack Arya Verse 1.0

Apr 2025

- Designed and delivered a full-stack Textile Management System managing 500+ SKUs within 24 hours; automated inventory tracking boosted operational efficiency by 40%.
