CAREER OBJECTIVE

Aspiring DevOps Engineer and AI & Data Science student (CGPA: 9.11) with hands-on experience in OpenShift administration, AWS EC2 cloud infrastructure, Docker containerisation, and Ansible automation. RHCSA-certified with a strong foundation in machine learning, Java full-stack development, and scalable system design. Seeking to build reliable, automated infrastructure and contribute to high-impact engineering teams.

EDUCATION

Arya College of Engineering & IT, Rajasthan Technical University B.Tech – Artificial Intelligence & Data Science CGPA: 9.11 / 10	Aug 2023 – May 2027
Govt. Boys Sr. Sec. School No. 2 12th – CBSE 86%	Mar 2022 – May 2023
I.G.M Sr. Sec. School 10th – RBSE 82.22%	Mar 2020 – Aug 2021

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL (PostgreSQL), JavaScript, HTML, CSS
DevOps & Cloud: Docker, Ansible, AWS EC2, Linux RHEL 9, OpenShift, LAMP Stack, SSH, Apache
Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Visual Studio, VMware Workstation
Databases: MySQL, PostgreSQL, MongoDB
ML / Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Logistic Regression, Decision Tree, Random Forest
Frameworks: JavaFX, FXML, JDBC, Maven

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) – Red Hat
- MongoDB Basics for Students – MongoDB University
- Salesforce Certified System Administrator – GeeksForGeeks

WORK EXPERIENCE

Game Programming Intern TechForce Academy Australia Remote (Credential ID: RlpCld) - Engineered 3 interactive game modules using Unity 3D and C#, applying OOP design patterns to improve code reusability by 40% - Developed physics-based gameplay systems and mechanics; reduced bug count by 30% through structured debugging cycles - Collaborated in an agile remote team, delivering all milestones on schedule across an 8-week programme	Jun 2025 – Aug 2025
---	---------------------

COMPETITIONS & ACHIEVEMENTS

Participant – UPI Fraud Detection System Hack Arya Verse 2.0 Jaipur - Built a UPI Fraud Detection System on a dataset of 10,000+ transactions using Logistic Regression, Decision Tree, and Random Forest - Achieved 95% model accuracy; reduced false positives by 20% through feature engineering and hyperparameter tuning - Evaluated with precision, recall, and F1-score metrics; presented findings to a panel of industry judges	Apr 2025
Participant – Textile Management System Hack Arya Verse 1.0 Jaipur - Designed and delivered a full-stack Textile Management System managing 500+ SKUs, orders, and customer records within 24 hours - Boosted operational efficiency by 40% through automated inventory tracking and real-time data visualisation dashboard	Apr 2025

PROJECTS

BloodMate – Blood Bank Management System Stack: Java, JavaFX, FXML, JDBC, MySQL, Maven, CSS - Built a desktop application managing 1,000+ donor and recipient records with real-time blood inventory tracking and emergency response coordination - Implemented role-based access control (admin/staff), reducing unauthorised data access risk across 5+ user roles - Designed responsive JavaFX/FXML UI; reduced average task completion time by 35% vs manual processes	Apr 2025 – Present
Hospital Management System Stack: Java (Core), JDBC, MySQL - Developed GUI desktop app handling 500+ patient records, appointments, billing, and staff data with full JDBC/MySQL integration - Automated billing calculations and appointment scheduling, cutting manual entry time by 50%	Mar 2025 – Present
WordPress Deployment on AWS (Ubuntu 22.04) Stack: AWS EC2, Ubuntu 22.04, Apache, MySQL, PHP (LAMP), SSH - Deployed and configured a production-grade WordPress site on AWS EC2; achieved 99.9% uptime over 30-day monitoring period - Configured LAMP stack, hardened SSH access, and applied security group rules — reduced attack surface by 60% - Optimised server performance via caching and tuning, achieving 25% reduction in page load time	Apr 2025
